

## UPDATE: Spire STL Pipeline and your natural gas service

Dear Spire customer,

We're committed to providing safe, affordable and reliable natural gas to our customers, every day. And keeping you informed about anything that could impact your service – from routine safety inspections to meter upgrades – is an important part of that commitment.

We're very pleased to share with you that, yesterday, the Federal Energy Regulatory Commission (FERC) reissued a permanent Certificate for the Spire STL Pipeline, the pipeline that brings you – and all St. Louis customers – affordable, reliable energy.

This decision ensures continued operation of the natural gas pipeline that delivers natural gas to our community.

Customers in the St. Louis area currently have the lowest natural gas costs across Missouri, with the Spire STL Pipeline playing a huge role in helping us keep those costs affordable.

For more information about the Spire STL Pipeline, visit: [SpireEnergy.com/STL](https://SpireEnergy.com/STL).

Thank you for the opportunity to serve you. We look forward to continuing to bring you the essential energy of natural gas.

Happy holidays to you and yours,

Scott Carter  
President  
Spire Missouri
